## USER'S GUIDE

### *Introduction*

The **Catalog of State Financial Assistance Programs** is a comprehensive listing and description of state administered programs of financial assistance. It is designed primarily to assist local government officials and community leaders in identifying and seeking financial assistance from Georgia's state agencies (or organizations that are administratively attached to state agencies). However, it also contains programs that are available to individuals and selected businesses.

This publication contains only those grant and loan programs administered at the state level. These programs may originate at the state level, or they may be federal programs administered on the local level by state agencies.

Information for the program descriptions was obtained through surveys that were sent to agency heads responsible for administering the programs.

### *Organization*

The **Catalog of State Financial Assistance Programs** is divided into four sections:

- User's Guide
- Subject Index
- State Agency Index
- Program Descriptions

The Subject Index is an alphabetical listing of the major program categories discussed in the Program Descriptions section. The specific programs are listed under the applicable program categories.

The State Agency Index lists all state agencies that reported financial assistance programs. Under each state agency, all programs administered by that agency are listed.

The Program Description section is the main body of the Catalog. This section is organized alphabetically by program title. This section presents, by program, the name of administering agency, the type of assistance, total funding level (if provided by the reporting agency), the maximum amount per

jurisdiction (if provided by the reporting agency), the type of assistance, the criteria for eligibility, the criteria for selection, how to apply, and the contact person. Generally, unless otherwise specified, references to “fiscal year” mean the state’s fiscal year (July 1 through June 30).

The programs listed in this Catalog have been cross-indexed according to their subject area and the state agency from which they originate so that the user can readily locate programs within this publication. Both indices list the corresponding page number for each program included.

Every effort was made to ensure the accuracy of information contained herein. The various state program administrators were given the opportunity to describe those programs, which are administered by their agencies. More detailed information on individual financial assistance programs can be obtained by calling the contact person listed for the individual program.
